

How to create and open games in the DGS Lines Manager

How to Import Games

To Import games go to the *Game Importer* application. Choose DonBest > Manual Import. *Free Feed url <http://xml.donbest.com/v2/rawschedule/>

*You need to have your ip cleared with donbest to be able to import from their free feed. You may contact them at feeds@donbest.com

Import from Don Best:

Select the Date for the events that you want to import by checking the “**By Date**” check box and selecting the day in the calendar on the drop down box.

Sport League

50 Games Imported

Click on the “**Connect**” button and the Schedule (all events) for the date you selected will appear in the window.

If you do not select a specific date then all available games will be loaded into the Imports Schedule window.

If you want all of the events in the window to be imported into your schedule, click on “**Check All**”;

if you only want a selected few then double click on each event.

When ready, click **"Import"** to import the selected games into your schedule.

A message will appear stating how many games where imported and/or if a game is already in the system and you want to import them again.

Click **OK** when done and close the window by clicking on the **X**.

How to manually Create Games

To manually create a game, go to the top menu and select **"Games"** then **"Add a Game or Banner"**

For the Major Sports (*NFL, College Football, NBA and College Basketball*) the screen is the same;

you need only select the sport and fill in the blanks with the information you want.

Note: *The lines and odds don't necessarily need to be entered at the time of the creation process;*

these can be added later when the game is already in the schedule.

At the bottom of the screen you have the option to select **OK** to accept or **Cancel** to ignore your actions.
